Theory Table

Based on 49 sources

Preposition/Symbol	Conceptual Entity	Information Measure	Algebraic Ladder State	Torsional Residue (Inferred)
Ω	Stabilization / Fixed point / Closure Operator	Shannon’s Perfect Coding Efficiency ($H = C$)	Octonionic / Nullifold	Stable recur residue (Null Residue)
Ξ	Recursion / Self-application / Meta-frame applicator	Recursive Distinction Depth (RDD) Levels 3-5	Complex / Recursive	Gradient of boundary violation; se recursive to
Φ	Contradiction / Aporia / Torsion Point identifier	Attention Vacuum Energy potential	Contrarecursive Filtration	Semantic to points ($\zeta(p)$) paraconsiste stable points
Δ	Distinction / Boundary creation	Initial dimensionality bits; extraction of conceptual structures	Real / Foundation	Primordial identity-oth boundary pressure; Li bracket resu
μ	Fixed-Point Binding / Least fixed point operator	Information-theoretic limit state	Recursive Manifold (Octonionic context)	Self-referen residue (ghc machine); b instability attractor
