Secret / Key Concept	Description	Algebraic / Geometric Anchor	Operational Principle	Physical Manifestation
Analytic Reality Closure (ARC)	The master meta-axiom where internal logic (intension) is equivalent to physical substrate (extension). A self-contained metalanguage wrapping languages and universes to restore linguistic functionality.	Fixed Point Identity / Global Operator- Descriptor / Involution	Ontic Self- Containment / Self- Generating Interpretation / Supertautological Intelligibility	Total Rotational Symmetry / Brai Sealing / Cognitive Theoretic Model of the Universe (CTMU)
The Socratic Engine	A gap-detection system that translates cohomological obstructions into irreducible questions to drive ontological expansion and resolve internal inconsistencies.	7-Operator Kernel / Cohomology Gap ($ker(d_r)/im(d_r)$) / Adjunction	Gap-Extraction / Attention Vacuum Energy Generation / Highest Torsion Edge Resolution	Prime Torsion Singularities / Dynamic Field Tuning / System Stability
Paradox Stabilization	The principle that logic and arithmetic are structurally stable because they utilize	Metamorphic Boundary ($\partial H^2 = id$) / Semantic Manifold with	Self-Negation Identity Maintenance / Paraconsistent	Consistency of Arithmetic / Quantum Superposition /
