Invariant Name	Mathematical Formalism	Paradox Depth (Kp)	Structural Function
Consistent Basis	K0	K0	Filtration level representing the foundation for small colimits and finite limits within the manifold framework.
Metamorphic Boundary	∂H	Kp	Operators governing the transition between different filtration levels and the preservation of structural properties across recursive transformations.
Quantum Superposition	Mapping of logical orders to physical manifestations	Kp	Representation of multiple logical states within the HALIRA framework across recursive transformations.
Prime Singularities	Mapping of logical orders to physical manifestations	Kp	Core logical invariants serving as fixed points in the Ξ - Δ Manifold during recursive processing.
Contrarecursion	Higher-order Kp	Kp	Filtration level governing high order recursive stability and logical invariance.
Consistent Basis	$L = F0$	K0	Initial data encoding of the
