Characteristic Name	Conceptual Domain	Algebraic/Logical Basis	Recursive Depth (RDD) (Inferred)	Field of Definition
Infinity-Category (Quasi-category)	Higher Category Theory	Weak Kan condition on simplicial sets; extension property for inner horns Λ_{nk} for $0 < k < n$	Level 1	Field of Definition
Infinity-Topos	Higher Topos Theory	Accessible left exact localization of a presheaf ∞ -category; satisfies higher analogues of Giraud's axioms	Level 3+	Field of Definition
Kan Fibration	Homotopy Theory	Right lifting property with respect to all horn inclusions $\Lambda_{ni} \subseteq \Delta_n$ ($0 \leq i \leq n$)	Level 1	Field of Definition
Proper Base Change	Topology / Topos Theory	Left adjointability of push-pull transformations in commutative diagrams of ∞ -topoi	Level 2	Field of Definition
Effective Groupoid Object	Internal Logic / Higher Topos	Simplicial object where the Čech nerve is a colimit diagram	Level 2	Field of Definition
