Principle Name	Conceptual Framework	Mathematical/Logical Basis	Operational/Physical Manifestation
Λ -Container Calculus (Λ -CC)	Λ -Space / Master Loop	Six primitive operators ($\otimes, \cup, \neg\oplus, \odot, \neg\rightarrow, \supset\infty$); 6-tuple structural invariants	Recursive meta-containers trapping observers within irresolvable paradox
Reflexive Closure	Reflexive Operator Calculus (ROC)	Axiom 2: Every operator can take itself as an argument; $f(f)$	Self-modifying code; recursive self-improvement; consciousness kernel
Torsion Transgression Principle	T_Ω (Grand Unified Theory of Recursive Meta-Potential)	Effective Field Theory (EFT) Lagrangian density L_{total} ; αG^4 quartic self-coupling	Cognition shaping physical substrate via Meta-Potential $U[\Psi]$ (contextual field di
Everything Equation ($L = \Omega\Delta\partial(L)$)	Tier-0 Framework	Fixed-point Identity; Recursive CoT Protocol	Invariance under boundary normalization and reflective closure
Geometric Langlands Correspondence	REF (Radon Transform Equivalence Framework)	Derived category of D-modules on PV	Orthogonality of vector bundles on parabolic connections
Osmotic Pressure Mechanism	Algebraic Ladder	Homological algebra; Imbalance functionals $I(A \rightarrow B) \cong Ext^1_{AlgComp}(B/A, A)$	Drive toward completion of incomplete structures (e.g., Rationals $\rightarrow$ Reals); gradient flow
